## Wildlife Treatment And Rehabilitation

We receive many kinds of injured, orphaned and displaced wild animals. Each animal is individually examined and treated with:

- \* Special veterinary care
- \* Recovery care
- \* Complete balanced diet
- \* Proper and safe housing
- \* Physical therapy and exercise
- \* Preparation for release
- \* Release into its natural environment

Properly rehabilitated animals relate normally to other animals in the wild. They mate and raise young. Many survive for years. Rehabilitation, done correctly, returns animals to their rightful places in the environment!
